How to Use this Guide

Provide two sets of plans and complete the following:

1. **Complete this Building Guide** by filling in the blanks on page two, and indicating which construction details will be used.

2. **Provide 2 Plot Plans** (site plan) showing dimensions of your project or addition and its relationship to existing buildings or structures on the property and the distance to existing property lines drawn to scale.

3. **Fill out a building permit application.**

   The majority of permit applications are processed with little delay. The submitted documents will help determine if the project is in compliance with building safety codes, zoning ordinances and other applicable laws.

---

The Colorado Chapter of the International Code Council is a professional organization seeking to promote the public health, safety and welfare to building construction. We appreciate your feedback and suggestions. To obtain a master copy of this building guide, please write to the Colorado Chapter of the International Code Council, P.O. Box 961, Arvada, CO 80001.

This handout was developed by the Colorado Chapter of the International Code Council as a basic plan submittal under the 2006 International Residential Code. It is not intended to cover all circumstances. Check with your Department of Building Safety for additional requirements.
Single Family Residential Uncovered Decks and Porches

Directions
1. Fill in the blanks on pages 2 and 3 with dimensions and materials which will be used to build the structure. Please print legibly.

2. Indicate in the check box which detail from page 3 will be used.

Address:

Size and Amount of Lags

Type of decking

(x) example: 1 x 4 or 2 x 6 - Trex

Beam splices to occur over posts with 1 1/2" bearing

36" high guard with balusters spaced so that a 4 inch diameter sphere cannot pass through

Beam splices to occur over posts with 1 1/2" bearing

2x____ joists spaced ____" apart

(example: 2 x 10" spaced 24" apart)

(____)____beam

(example: (2) 2 x 10 - see detail B)

2x____ rim joist

(example: 2 x 10 - see Alternate B1 & B2)

____x____ posts spaced ____" apart

(example: 4 x 4 posts spaced 8' apart)

Span

(example: 13' - 4"

Type of siding

(existing)

Note: A plot plan (plan view) showing the dimensions of your project or additions and its relationships to existing buildings or structures on the property must be included. In addition to project dimensions, your plot plan must also show other details such as post locations and spacing, joist and beam spans, and any other pertinent information not shown on the section drawing.

Note: Emergency escape windows are allowed to be installed under decks and porches provided the location of the deck allows the emergency escape window to be fully opened and provides a path not less than 36" in height to a yard or court. 6'8" required for walk out basements or patios.

Conditions such as attachment to cantilevers or veneers may require Engineer's approval

Engineer's approval required

This handout was developed by the Colorado Chapter of the International Code Council as a basic plan submittal under the 2006 International Residential Code. It is not intended to cover all circumstances. Check with your Department of Building Safety for additional requirements.
Detail A

- Existing building
  - Approved flashing required
  - Attach to joists with non-corrosive fasteners

- Attach ledger to existing building with non-corrosive lag bolts spaced min. 16" apart. Locate bolts to penetrate rim joist or wall studs.

- Non-corrosive metal joist hanger

Conditions such as attachment to cantilevers or veneers may require Engineer’s approval.

Detail B

- Beam splices to occur over posts with 1 1/2" bearing

- Secure balusters to beam

- Non-corrosive metal joist hanger

- Non-corrosive metal post/beam connector

Alternate Detail B1

- Beam splices to occur over posts with 1 1/2" bearing

- Secure balusters to beam

- Non-corrosive metal post/beam connector

Alternate Detail B2

- Full depth 2x solid blocking

- Beam splices to occur over posts with 1 1/2" bearing

- Secure balusters to beam

- Non-corrosive metal post/beam connector

24" max.

Detail C

- 1/2" (min.) diameter anchor bolt embedded 7" min. into concrete pier or the equivalent

- Non-corrosive metal post anchor

- Finished grade

- 8" min. If less than 8", post must be decay resistant

- 8" (min.) diameter pier

- 36" inches min.
Single Family Residential Uncovered Decks and Porches

Stair & Handrail Specifications

Stairway Notes:
1. Stairways shall be not less than 36” in width.
2. Stairway rises shall be not greater than 7 3/4”.
3. Stairway treads shall have a minimum run of 10”.
4. The length of Run and the height of Riser shall not vary more than 3/8” in the entire run of the stair.
5. Stairs are required to be illuminated.
6. Open risers permitted if opening is less than 4”.
7. A nosing not less than 3/4” but not more than 1 1/4” shall be provided on stairways with solid risers, and less than 11”.
8. Composite materials (example: Trex) may require 4 stringers

Handrail Notes:
1. Handrails shall be continuous on at least one side of stairs with 4 or more risers.
2. Top of the handrails shall be placed not less than 34 inches nor more than 38 inches above stair nosings.
3. The handgrip portion of handrails shall be not less than 1-1/4 inches nor more than 2 1/4 inches in cross section for non circular handrails.
4. Handrails shall be placed not less than 1-1/2 inches from any wall or other surface.
5. Handrails to be returned to wall, post or safety terminal (per 311.5.6.2 IRC)

Acceptable Handrail Details

Unacceptable Handrails
